

Comparing Special offers

Princess Chin will have a picnic next week, so Grandma Chin takes her to three supermarkets to compare the prices of her favourite QQ apple juice.

Supermarket A

- Original Price: \$8/carton
- After discount: \$4/carton
- Will expire in 3 days

After the discount, each carton of apple juice costs

\$ _____

Supermarket B

- Original Price: \$10/carton
- Buy one get one free
- Will expire in 6 months

After the offer, each carton of apple juice costs

\$ _____

Supermarket C

- Original Price: \$12/carton
- Buy 2 get 1 free
- Will expire in 6 months

After the offer, each carton of apple juice costs

\$ _____

Let's think

- Which supermarket offers the best price?
Supermarket A / B / C
- If you were Princess Chin, which supermarket would you shop from? Why?
Supermarket A / B / C, because:

Key learning points

- Compare prices offered by different outlets before purchasing
- Make your choice after comparing different special offers and sales
- Apart from the price, you should also consider other factors, such as the expiry date.
